

# GIANT

## GT MACHINES

### Choose Your Speed With Vibratory Tubs

*From aggressive deburring or descaling to fine finishing or polishing, Giant GT SERIES work.*

*Offering 3 to over 400 cubic feet of capacity with an inside tub dimension to meet your specific processing requirements, Giant GT SERIES machines are supplied with features including ergonomically friendly working heights, electronic variable speed drives, curved wall and adjustable eccentric weights.*

*These machines can be adjusted to provide very aggressive action for tough to finish parts to gentle agitation for fragile parts.*

*Eliminate hand deburring.*

*Save on labor.*

*Giant GT SERIES for large parts or compartmentalized processes.*

*Great for work cells.*
